The following will not be entered as it constitutes new matter:

1.

Column 2,
Lines 13-14, delete "$b_{eff}(f,t) = (f_1(t), \omega_2(t), \gamma^{-1}f)$." and insert -- $b_{eff}(f,t) = (\omega_1(t), \omega_2(t), \gamma^{-1}f)$,   (5) --.

      This mathematical expression is considered different than the original where the original

included a function of f1(t) as opposed to using a function ω1 which is a different value. Also,

said expression cannot be entered since there is no previous support for it in the Specification or

any suggestions in the Specification of how to get to said equation

2.

Column 12,
Line 34, delete "$t \in R$," and insert -- $\xi \in R$, --.

      This expression cannot be entered as it would not be in accordance to the previous

equation "$t \in R$" as discussed in Column 12, line 26.

3.

Column 19

    Line 60, delete "If $\in^{D}+(S^1)$," and insert -- If g $\in^{B_+}(S^1)$, --.

      This expression cannot be entered since the expressions ε^{D} is considered a different value

or expression than ε^{H} wherein the meaning of each differs. Also, said expression cannot be

entered since there is no previous support for it in the Specification or any suggestions in the

Specification of how to get to said expression.

   4.

<u>Column 22</u>,
Line 51, after "$r \in L^\infty (S^i)$," insert -- $\zeta_j \in {}^D \setminus \{0\}$, --.

        This expression cannot be entered since there is no previous support for it in the

Specification or any suggestions in the Specification of how to get to this equation.
